## Net Bags with Color Pictures

We will ship your bulbs in these colorful net bags. The bag will give the bulbs plenty of ventilation until you get them planted. Each bag has a color picture printed on it with the variety name, size and amounts per pack to eliminate any mistakes on the planting sight. You can even leave the picture with your customers so they know what to look for in the spring or select their favorite varieties for the following year.

## mar.ket.ing

'Marriam Webster defines it as the activities that are involved in making people aware of a company's products. In 2007 we started developing tools to make selling our products easier for our customers. We saw our customers needs and started producing tools to help you sell more product. So let us show you what we can do for you.

## Guide for estimating quantity of bulbs needed

This guide is a reference only, for more intense displays or beds that will be mostly viewed from a short distance adding more bulbs per square foot (perhaps even doubling the amount) is recommended.

### Square or rectangular beds:

$\text{width} \times \text{length} \times \text{number of bulbs per square foot}$   
= number of bulbs needed to fill space

### Round beds:

$\text{radius}^2 \text{ (1/2 diameter of the circle}^2) \times 3.14$   
 $\times \text{number of bulbs per square foot}$   
= number of bulbs needed to fill space

## Daffodil Paperwhite

These bulbs are excellent for  
indoor 'scaping'.

The indoor daffodil has a  
sweet fragrance. The bulbs  
can be grown in bowls with  
pebbles or soil, but the  
blooms will last longer when  
grown in soil. After planting  
the bulbs need a 10 week  
cold period at 9°C / 48°F.  
After this store the bulbs  
warm at 20°C / 68°F.

Excellent for outdoor planting  
in zones 7 and warmer.

**For indoor and warm climate**

### Guide for estimating quantity of bulbs needed

This guide is a reference only, for more intense displays or beds that will be mostly viewed from a short distance adding more bulbs per square foot (perhaps even doubling the amount) is recommended.

**Square or rectangular beds:**  $\text{width} \times \text{length} \times \text{number of bulbs per square foot} = \text{number of bulbs needed to fill space}$

**Round beds:**  $\text{radius}^2 \text{ (1/2 diameter of the circle)} \times 3.14 \times \text{number of bulbs per square foot} = \text{number of bulbs needed to fill space}$

# Why De Vroomen Garden Products?

## A broad and deep collection of proven landscape varieties

The De Vroomen Garden Joy landscape program consists of 250+ carefully selected varieties. Tulips and Daffodils are by far the most popular varieties in our landscape line-up but at De Vroomen Garden Products we also offer a large variety of specialty bulbs. Varieties like Allium, Scilla and Fritillaria are becoming more popular because they will offer your customers a special and different landscape display. Please contact us with any special requests for items that are not listed in our catalog. We will be glad to source the varieties you need.

### Premium Bulb Sizes

We offer our bulbs in different sizes but overall we focus on bigger, premium bulbs. The bigger the bulb the better the result and at de Vroomen quality comes first. Bulbs are measured by their circumference in centimeters. For instance a bag of 12/+ cm Tulips consists of bulbs with a circumference of 12 cm or larger.

### Packing and delivery by job name

We can pack your orders by job name. Just send in a PO per project and you will receive your bulbs packed accordingly. This will save you a lot of time and money sorting out your delivery. We pack our bulbs in mesh landscape bags. Each bag has the variety, size and amount of bulbs imprinted. We also register the production number which allows us to track each bag of bulbs back to the grower. A valuable instrument to increase quality year after year.

## Production and Quality Control

Everyone at our company will make sure we provide you with the best possible quality flower bulbs. De Vroomen Garden Products is known for delivering healthy, true-to-name and true size products. Because de Vroomen takes quality seriously, we are a member of the Holland Selection organization. Being a member of this organization we guarantee:

- the highest quality flower bulbs;
- supreme flowering, provided the instructions on the package are followed;
- healthy bulbs upon delivery;
- that the variety, color and size of the bulbs agree with what is stated in our catalog;
- proper handling of customer complaints;
- tracking and tracing from grower to consumer in order to improve our quality and customer service.

Our products are packed in a state of the art production facility in Lisse, Holland. The independent Dutch Flowerbulb Inspection Service conducts inspections during the production process and thereafter. As well as using independent inspectors, we also have our own staff members to monitor quality, packing of your bulbs and paperwork. They use modern scanning technology for early detection of diseased bulbs, special counting and packing machines for premium packing and a professional logistical system for order picking.

Nothing brings attention to commercial signage and properties like spring bulbs. When the world around us is drab and dreary, bulbs act like a laser light to focus people's attention to that signage your customers paid so much money for to attract attention.

Yes as it ***increases visibility,***  
it will  
***increase their profits!***
